Junior IAM & Cyber Security Professional

PROFESSIONAL SUMMARY

Cybersecurity professional with hands-on experience in identity and access management concepts, vulnerability assessment, and security operations. Practical experience reviewing authentication and authorization implementations including JWT, RBAC, OAuth and access control mechanisms across development and security projects. Background spans cybersecurity analysis, software engineering and cloud deployments, enabling strong understanding of identity flows across modern applications.

Currently completing an MSc Computing degree at the University of Roehampton while building expertise in identity governance, authentication security, access management, and enterprise IAM.

IDENTITY & ACCESS MANAGEMENT SKILLS

Authentication & Authorisation: JWT, OAuth 2.0, RBAC, Access Control Reviews

Identity Concepts: Least Privilege, Role Design, User Provisioning, Access Governance, Identity Security, Authentication & Authorisation Flows

Security & Frameworks: OWASP, NIST, MITRE ATT&CK, ISO 27002, PCI DSS

Security Tools: Nessus, Burp Suite, WPScan, OpenCTI, Zabbix

Cloud & Development: Docker, GitHub Actions, Python, FastAPI, Node.js, React, TypeScript, PostgreSQL, MySQL

Soft Skills: Stakeholder Communication, Cross-functional Collaboration, Analytical Problem-Solving, Technical Documentation & Reporting, Adaptability, Attention to Detail

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst

Oct 2025 – Present

Cyblack UK

- Reviewed authentication and access control implementations across environments, assessing JWT, RBAC and authorisation flows to improve identity security posture and reduce access risks.
- Supported security assessments and remediation activities using Nessus, Burp Suite and WPScan while translating findings into business-focused reports and MITRE ATT&CK aligned recommendations.
- Deployed monitoring and threat intelligence environments using Zabbix and OpenCTI across multi-VM infrastructure, strengthening visibility and proactive threat analysis capabilities.
- Collaborated with technical and non-technical stakeholders to communicate findings and support remediation initiatives.

Founder & Product Engineer — Planacle

Nov 2025 – Present

Planacle (Live AI Product)

- Developed and deployed a production AI platform using React, TypeScript, Firebase and CI/CD pipelines.
- Applied secure development principles across authentication and access flows within cloud environments.
- Built and maintained production infrastructure with testing, deployment and monitoring practices.

Founder & Lead Developer — Awade

May 2025 – Sep 2025

Awade (MSc Dissertation Project)

- Designed application identity architecture including Google OAuth integration, JWT authentication, refresh token rotation and multi-role RBAC access models supporting EDUCATOR and ADMIN permission boundaries.
- Implemented secure access patterns across user roles and permissions while supporting scalable deployment.
- Applied security-first development principles suitable for educational environments.

IT Support Specialist

Jan 2024 – Sep 2024

Send Me Global Logistics

- Configured and maintained user accounts, permissions and access controls.
- Delivered first-line support across hardware, software and network environments.
- Assisted users with troubleshooting and onboarding activities.

IDENTITY SECURITY & IAM PRACTICE

- Implemented JWT authentication, OAuth integrations and role-based access models within full-stack applications.
- Applied least-privilege principles when designing multi-role systems and reviewing access permissions.
- Studying enterprise IAM concepts including identity governance, access lifecycle management and privilege control.

CERTIFICATIONS

AWS Certified Cloud Practitioner

Amazon Web Services

Introduction to Cybersecurity

Cisco Networking Academy

EDUCATION

MSc Computing

Sep 2024 – Sep 2026

University of Roehampton, London

Modules include: Cybersecurity, Databases, Software Development, HCI, Research Methods

Full Stack Development Bootcamp (MERN)

Jan 2023 – Jul 2023

GOMYCODE

BTech Industrial Chemistry

2013 – 2018

Federal University of Technology Akure
